

## sun and moon eyes

she holds the sun and moon  
upon the fingertips  
of either hand

within her eyes  
reflections of  
a burning sphere  
and frozen orb  
replace the black holes  
of each pupil's place

her irises  
a green microcosm  
of patchwork fields  
seen from on high

within the air  
within white space  
within her golden hair  
within her face
